JAN 1 9 7006

Our Docket No. 20030242.ORI
UNITED STATES PATENT AND TRADEMARK OFFICE

Re App : Ronald Wrenholt, et al

S.N.: 10/624,207 Art Unit 2176

Filed: July 22, 2003 Examiner James J. Debrow

For : METHOD AND SYSTEM FOR AUTOMATING
THE PRODUCTION OF PUBLICATIONS

DECLARATION OF RONALD WRENHOLT

I, Ronald Wrenholt, make this declaration in support of the above-captioned patent application.

- 1. I am one of the inventors of the inventions covered by the claims of the subject application.
- 2. I understand the claims of the subject application stand rejected under 35 U.S.C. § 103 based upon U.S. Patent No. 5,991,783 dated November 23, 1999 ("Popa et al") in view of U.S. Patent Publication No. 2004/003411 Al ("Nakai et al").
- 3. Nakai et al was published on January 1, 2004. This publication date is more than five months after the July 22, 2003 filing date of the subject application. The Nakai et al application, which resulted in the Nakai et al publication, was filed with the U.S. Patent and Trademark Office on June 27, 2003. We completed the invention we are claiming in the subject

application before June 27, 2003. Therefore, the Nakai et al reference is not prior art.

- 4. The subject application was assigned by me and my coinventors to our employer, Lifetouch Inc. Lifetouch Inc. is the
 nation's largest school photography company and an industry
 leader in the yearbook publishing business. The invention
 covered by the subject invention arose out of Lifetouch's desire
 to (a) further automate the yearbook publishing business; and
 (b) provide the students who comprise school yearbook staff the
 opportunity to create and edit yearbook pages on line.
- 5. Lifetouch refers to its commercial embodiment of the invention covered by the subject application as "Volumes II". Lifetouch commercially implemented its Volumes II product prior to June 27, 2003 and it was successfully used by Lifetouch and its customers to create pages for yearbooks before that date.
- 6. Exhibit A is a guidebook prepared by Lifetouch and used by its Volumes II customers before June 27, 2003. This guidebook assisted those using the method of the present invention in the creation of yearbook pages. Again, such pages were created using the method claimed in the subject application.
- 7. Claim 1 of the subject application defines a method for creating pages for a publication. A yearbook is a

publication that has pages and the Volumes II system is used to create the pages of the yearbook and the yearbook itself. See Exhibit A.

- 8. Element "a" of claim 1 of the subject application requires assembling a collection of images to appear in the publication. This was done in several ways using the Volumes II system. As described on pages 4-6 of Exhibit A some images are collected by the school's yearbook staff and mailed to Lifetouch. Other photos (e.g. school portraits) are taken by Lifetouch or a non-Lifetouch professional photographer. In this way, a collection of images to appear in the publication was assembled.
- 9. Element "b" of the method defined by claim 1 of the subject application requires collecting data related to the images. Page 6 of Exhibit A describes one way data related to images was collected. The discussion on page 6 relates primarily to data concerning photographs taken by the yearbook staff. Page 18 discusses how the data collected was used to keep track of photographs. Page 20 describes the types of data collected related to portrait images taken by Lifetouch photographers.
- 10. Element "c" of claim 1 of the subject invention requires the creation of a database linking the images collected

to the data related to the images and storing said images and database on a first computer system. The first computer system referred to is the computer system maintained by Lifetouch Inc.

The images and data related to those images were stored in a separate database on the Lifetouch computer for each of our yearbook customers. This database linked the images to the data. A separate website was also created for each yearbook customer so that the school's yearbook staff could access the database from a remote computer. The various screen shots shown on pages 8-10, 12-15 and 17-27 were created by accessing such a database and linked photos stored on the first computer. See in particular the screen shots on pages 19, 20, 22 and 23.

11. Element "d" of claim 1 of the subject application requires using one of a plurality of second computers at a location remote from said first computer system to access the database. The plurality of second computers used in the Volumes II was all of the computers in the world having internet access. Page 36 outlines the desired specifications for a second computer used with Volumes II. Pages 8-10 describe various security measures employed to ensure that only authorized users get access to the database (website) for a particular yearbook customer. The screen shots on pages 9, 10, 12, 13-15 and 17-24 are all copies of screens that appeared on the internet browser

JAN-13-2006 12:25 P.06/11

of a second computer (i.e., a computer located at a customer's site) as a result of accessing the database stored on the first computer (i.e., Lifetouch's computer system).

- 12. Element "e" of claim 1 of the subject application requires using one of the second computers to select and communicate to the first computer (i) the desired page layout for at least one page of a publication; and (ii) the desired manner in which the images should be grouped. How this was done in the Volumes II system is described on page 20 for the portrait pages of a yearbook. Using the yearbook customer's computer, the user would log on to the website on the Lifetouch computer system. The user would select and communicate to the Lifetouch computer system the desired page layout for at least one page by selecting a "style sheet" and "portrait layout design". See paragraphs 4 and 5 on page 20 of Exhibit A. In the same fashion, the user would use the second computer to communicate the desired manner in which images should be See paragraph 2 on page 20 of Exhibit A which indicates the grouping choices included sorting the portraits by the grade, homeroom or teachers to whom the students pictured were assigned.
- 13. Elements "f" of claim 1 of the subject application requires using the first computer system to create and store as

JAN-13-2006 12:25 P.07/11

a file a panel for at least one page of the publication based upon the desired page layout and manner in which the images should be grouped. This element of the claim also requires that this file contain low-resolution versions of the images. These are the "portrait panels" described in paragraph 6 of page 20 of Exhibit A.

- 14. Element "g" of claim 1 of the subject application requires that one of the computers be used to place the panel into a page and communicate to the first computer system that the page is acceptable. In Volumes II, the Page Builder feature of the software was used to place the completed portrait panels into the pages. See paragraph 7 on page 20 of Exhibit A. Pages 25-32 describe how the Page Builder feature was then used to review and edit the pages. When the pages were deemed acceptable, the user would submit them for printing. See Exhibit A, page 25. This, again, was done online by clicking on the screen of the second computer (the school's computer) to send a signal to the first computer (Lifetouch's computer). See Exhibit A, page 21.
- 15. Element "h" of claim 1 requires using the first computer to modify the acceptable page by changing the low-resolution images to high-resolution images. As noted at the bottom of page 25, "Once your pages are submitted for

JAN-13-2006 12:25 P.08/11

printing, the low-resolution images will be replaced with highresolution files by our pre-press professional system."

- 16. Finally, element "h" of claim 1 requires printing the modified page as part of printing the publication. Page 32 of Exhibit A describes the color proofs that were printed to check color. Pages 33-34 describe final printing of the yearbooks and delivery of the yearbooks to the school.
- 17. Exhibit B is a copy of a log report covering
 Lifetouch's commercial implementation of the Volumes II system.
 The log report covers the work of various teams of Lifetouch
 personnel involved in this implementation. The work of each
 team is reflected separately in a separate section of the
 report. Each section is organized chronologically. All dates
 in the report, which have been masked, predate the June 27, 2003
 filing date of the Nakai et al reference.
- 18. The work of the technology team is reflected on pages 4 and 5 of Exhibit B. The first set of entries in this section of the report indicates that Lifetouch had 65,000 images "online" and that the average was 760 images per school. This means that this collection of images had been assembled as required by element "a" of claim 1 of the subject application, data related to the images had been collected as required by element "b", we had created and stored on our computer system a

database linking the images collected to the data related to the image as required by element "c", and we had made the database and images available "online" to remote computers as required by element "d".

- 19. Further down on page 4, the technology team's section of the report says that we had "35 successful Flash! flows" is a term we used to describe the steps of (1) having the customer select and communicate to our computer system a desired page layout for the portrait pages of a yearbook and a desired manner in which the images should be grouped; and then (2) using our computer system to create and store as a file a panel for each portrait page of the yearbook based upon the desired page layout and method of grouping. To conserve space on our server and to speed data transmission between our computer system and the computers at a school used by the school's yearbook staff, these panels included low-resolution thumbnail versions of the photographs to be included on the page. Hence, the statement "35 successful Flash! flows" indicates that our system had performed as required by elements "e" and "f" of claim 1.
- 20. Another team involved in the Volumes II project was referred to as the "Pages" team. The work of the Pages team is the subject of Exhibit B starting at the bottom of page 1 through the bottom of page 2.

JAN-13-2006 12:25 P.10/11

A fourth entry in the Pages team's section of the 21. report reads "Page proofs to 3 schools 120 pages...Good news new server will allow faster production of high res proofs for Volumes." The fifth entry indicates 2117 pages had been "Submitted", 708 high res PDFs had been made, and 9 schools had received color proofs. As discussed above and described in Exhibit A, pages are "submitted" after the copy, photos and graphics are placed on the page. See Exhibit A, page 4, paragraph 5. As reflected on page 17 of Exhibit A, this is done on the school's computer by clicking the "submit to Lifetouch" button shown in the screen shot. This sends a signal from the school's computer to Lifetouch's computer system. Thus, at the point in time when the pages are "submitted" each step required by elements a-h has been successfully completed. The entries in the report related to the production of "high res proofs" and page proofs being sent to three schools indicates that, upon "submission", Lifetouch's computer system modified the submitted page by changing the low-resolution images to high-resolution images and then printed the modified pages as part of the printing of the publication. Thus, this section of the log of events provided by the report of Exhibit B indicates that the invention defined by claim 1 of the subject invention was

successfully used to create pages for a publication before the June 27, 2003 filing date of the Nakai et al reference.

Further declarant sayeth not.

Ronald Wrenholt

Date: January 13, 2006.

- · □ Quark XTension Vincent will fix today
- Tasting on Adobe Plug-In Windows Adobe process did not work.

▼ □ Technology

- D Hot fix was pul back on last night
- .

 Mac was very tast this morning
- D Indexing is ready for testing and uploading

▼ □ Technology

- D Server hasn't crashed since hot fix was reapplied
- □ Do we still want a Vol 1 check-in?
- High res pdf workflow is working

▼ □ Technology

- D Server is stable
- □ Thang building pages in KC
- Indexing is all set except for documentation

▼ □ Technology

- D Website changes have been prioritized
- D Font licensing options are being evaluated

▼ □ Sales Update →

- D Preparations for Winter Meeting
- □ Rebooking Cell 72% 1.2 mil rebooked
- D Bill, Sarah and Al haven't rebooked
- □ \$15,000 for 2004

▼ □ Sales

- U Sarah Rogers last day is tomorrow
- D Ceil will take over her schools
- D Rebooking still going well

▼ □ Sales Update.

- Current focus on new business and rebooking (42%) 1.5 mil
- □ Bay area transition is set with Cell taking Vol and NP
- Rest of the bus, will go to John Capistrant
- . O Finishing perf reviews for the reps
- D Schedule a call with reps to encourage page submissions

D Sales Update 200

▼ □ Sales Update 3

- Raps are working on getting pages ins
- D 56% rebooked by Mar. 7 met the tier vs. 1 or 2 schools last year at this time
- □ Should see some new business in next week and 1/2

▼ □ Sales Update

- D \$50,000 of new sales for next year (5 new accounts)
- \bullet \Box Working on adding 4 territories to add Volumes product line

▼□ Sales Update 4

- □ 2 new accts from Ed M. \$61K
- □ 1 new acct Cathy \$28K, Cell \$11K, Bill M \$50K
- Q Expanding into 4 areas, Montana, CB territory, NW III, St Louis
- Adding 4 other LPI reps Mlami, Atlanta, Phoenix, Cinncinati
- Chris will arrive in KC Sunday

▼ □ Seles Update □ Seles Update

- □ 66% Rebooked as of this morning (4 reps above 80% Cell, Gerl, Ed M, Cathy)
- 2.3 Million renewed out of 3.5
- □ 6 Reps have new schools (Cell \$77K, Ed \$55K) \$235K to date.
- □ Palo Verde is lost for next year (N'Perspective)
- Are N'Perspective delivering ontime? (Chris hasn't heard complaints)

▼ □ Marketing

- D Working on a marketing piece for the meeting (Would you go back?)
- Banners are done
- □ Presentation materials are done
- D Trying to finalize pub agreement

▼ ■ Marketing

- □ Working on 2004 pricing and pricing tool (2/19/03) U Volumes demo
- D Marketing brochure finalized next week
- D Follow up from Winter Meeting
- □ Working with Rachel on Cover Process
- ☐ 2004 Kit Materials
- D Support for supplements (pricing and sales tool)
- B Build a form to indicate which pages are color
- 🛛 Talk to Friesens about shipping specs
- Determined final page proofing process

Karen

Chris

Proof the first 32 pages (or less if they have less) of color with a hard copy proof. Still post pdfs online with instructions to make corrections online. Add final approval process to the ladder. We will post single page pdfs for Vol 1. Encourage usage of Special Instructions instead of e-mails for indicating corrections. Charge for a new PageMaker file is \$17.00?. Charge for a new photo is ?.

▼ □ Marketing

- ☐ Finalized Marketing mailing, flyer, demo
- Three outstanding issues with Rachel Amlee will send email to me
- Still working on kit materials pricing tool, deadlines for reps

▼ □ Marketing ■

1/3/04 9:12:51 AMAM

volumes manily meeting piptes

- Pricing tool is almost finalized
- D Kit materials meeting with Production and Karen, Ron to determine items
- D Instructed North Branch on Indexing
- C We activated indexing for Round Lake Julie to call
- D Worked on schools needing master pages
- D Lead generation with postcards

We will use same database as what was used for calendar promotion. Reps finalize edits and contact Cherie to get mailing out. Reps will follow up within a week.

- D Create a way to get extra promo pieces to reps
- □ Ed has had comments on 52 page book in demo
- D Karen following up with Curwin on shipping specs
- D Check on special namestamped copies for principal and others

▼ □ Marketing

- □ Working on kit materials
- Mostly focused on production

▼ □ Marketing 4000000

- D Check with Houa to see it mailings for Milne are going out
- ▶ ☐ Requested 10 more demo CDs from Trekk
- D Pricing tool no communication on grandfathered schools until books are finaled

We won't know which schools are affected until they invoice out. Need some wording to explain that there are possible cases of schools which will need adjustments.

D Chris will communicate to the reps on Monday about using the lead generation

▼ □ Marketing

- □ 44 Surveys are back trying to get the rest in.
- □ Drawing next week cameras to deliver in the fall
- D Working with Sheri on information we need to capture
- Hiring Graphic Designer

▼ O Marketing

- Graphic Design intern starting next Tuesday
- D Kit materials are the focus ready by August 1
- D 47 Surveys are back.

₩		Pri	oritizing Future Enhancement Ideas
			Throughout the year, we have captured many good suggestions from our Volumes customers for future enhancements to the Volumes program. Please rank these possible enhancements to the Volumes process and website from 1 to 10 (1= MOST important, 10= LEAST important).
	•		Online help screens
	•		Additional font choices
	•		Ability to track book sales online
	•		24/7 access to in-plant customer service
	•		Availability of online consultations with a skilled designer
	•		Online image editing capabilities
	•		Online ad-builder for personal or business ads
	•		Spellchecking

- • □ The ability to customize portrait page layouts
 - ☐ Guides and rulers in the online PageBuilder
- Other comments:
